Krish Zhao Kaushik

Richmond, BC, Canada | 604-908-7152 | krish.z.kaushik@gmail.com | krishzkaushik.com | github.com/krishkaushk

Education

Simon Fraser University — Burnaby, BC, Canada
Bachelor of Science, Major in Computing Science, Minor in Business — *Sep 2024 – Apr 2028 (Exp.)*

- **Coursework:** Data Structures & Algorithms, Systems Programming, Computer Systems, Software Engineering

Experience

HME Medical Distribution Ltd. — Jun 2025 – Present
Web Development and IT Contractor (Part-Time) — *Sep 2026 – Present*

- Spearheading a full **website redesign**, modernizing pages and working with design and external vendors as needed
- Leading deployment of **macOS** systems company-wide to **130+ employees**

IT and Marketing Intern — *Jun – Aug 2025 & May – Aug 2026*

- Automated CRM workflows for rentals, trials, and orders in **Node.js**, saving **20+ hours a week** across teams
- Built **Azure Functions** on the CRM's **REST API** that email trial reports and sync asset status by webhook
- Moved **70+ live CRM functions** into Git with **GitHub Actions CI/CD** that checks for drift before deploying
- Built an internal site mapping **170+ workflows**, with training guides and a write-blocking test mode
- Configured an internal **AI copilot agent** for search across **500+** technical service documents

Richmond Youth Basketball League — Oct 2022 – May 2024
Basketball Coach and Referee

- Led practices and refereed games, communicating with players and parents and resolving conflicts under pressure

Projects

Meowminos Delivery Game | *Java, Maven, JUnit, Mockito, LibGDX* | GitHub | YouTube — Jan – Apr 2026

- Built delivery, movement, and respawn systems for a 5-person game; won **2nd best game** and **best presentation**
- Co-built **500+ unit and integration tests** with **JUnit** and **Mockito**

Scrubs | *Python, Flask, Presidio, GLiNER, TiDB, Gemini API* | GitHub | Devpost — Oct 2026

- **Led the backend** of a hackathon app that **masks PHI** in clinical notes so clinicians can safely use LLMs
- Raised indirect identifier detection from **73% to 98%** vs default Presidio on a held-out synthetic test set
- Designed a **∼160-test Python suite** with privacy tests, and reviewed teammates' pull requests on GitHub

InternLinked | *JavaScript, TypeScript, React, Supabase (PostgreSQL)* | GitHub | Devpost — Jan 2026 – Present

- Designed the **PostgreSQL schema** for applications, profiles, saved jobs, and a shared job cache
- Built a **Supabase Edge Functions** backend that pulls postings from **4 job board APIs** and removes duplicates
- Built a **two-stage ranking pipeline**: a keyword filter cuts **∼150 jobs to ∼25**, then an **LLM** scores each one

Leadership

Management Information Systems Association (MISA) — Aug 2026 – Present
Software and Web Development Coordinator — *Simon Fraser University*

- Building the club's event ticketing API in **Express** and **TypeScript** for **Stripe** checkout, to be deployed on **AWS**
- Designed the **PostgreSQL** schema for events and early-bird ticket tiers, with **Zod** validation and unit tests

ForGood Initiative — Oct 2026 – Present
Software Developer — *Burnaby, BC*

- Design and build responsive, multi-page websites using **React**, **TypeScript**, **Vite**, and **Tailwind CSS**

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, C, C++, SQL, HTML, CSS, Bash
Frameworks & Libraries: React, Node.js, Express, Next.js, Flask, Tailwind CSS, Vite, JUnit, Mockito
Cloud & Databases: PostgreSQL, Supabase, Azure Functions, Power Automate, Docker, Vercel, Stripe API
Tools & Concepts: Git, GitHub Actions, CI/CD, Linux, Maven, REST APIs, Unit Testing, Scrum, LLM Integration
